

FORENSIC ASPECTS of ANCIENT EGYPT

A Study Day presented by **Joyce Filer BA; Dip. Arch; M.Sc; M.Sc**

*formerly Curator of Human & Animal Remains, Dept of Ancient Egypt
and Sudan, British Museum, London*

Repeated
by popular
demand !

Saturday 20 February 2010: 11 am - 5 pm

at: University of London, Garden Halls, Cartwright Gardens, London WC1

The 21st century has seen incredible advances in our knowledge and use of forensic sciences - to investigate crimes and to find out about people from ancient times. How can we apply this information to the people of ancient Egypt?

Join us on this fascinating study day to learn about:

- identifying the age at death of a mummy or skeleton
- if the body is male or female
- what diseases people had
- facial reconstruction
- Other scientific techniques

AND test your skills in a hands-on practical session

Cost £30

To include
afternoon
refreshments

Please note:

as places are limited bookings
must be received no later than:

4 February 2010

Joyce has undertaken cemetery excavations (in Egypt, Sudan and Britain), CT scanning projects and forensic examinations. She is the only British Egyptologist to have officially examined the body from KV 55, thought to be Tutankhamun's brother. She has made many tv appearances and written widely on ancient Egypt. She is a world acknowledged expert on mummies.
